### **CONSIDER THE FOLLOWING ITEMS:**

- 1) A number of classes taught by same lecturer in our department appeared at the same time in the main time-table, so we have swapped a number of them in a manner to correct collision, accommodate the students' numbers, and retain the lecture halls allocated to us. Kindly bear with the changes that emerged.
- 2) **Madam Jane** to co-ordinate the entire lab lessons for the COSC 103.
- 3) **Class representatives** who should find which exact group on the common course they belong to and ensure that if there is collision then we can correct, as there are several common courses slots available on the main time table.
- 4) I have also included FREE classes and Computer labs that one could use for make-ups and rescheduling of the classes.
